

Park & Ride

With RingGo Park & Ride you can offer credit and debit card payments, either in addition to cash or as a standalone solution, dispensing with machine payments entirely. Customers can pay in advance on the internet, or once they've parked by calling RingGo. A confirmation text message with special identification code, is shown to the driver, to allow entry to the bus.

Key benefits

- Dispense with cash payments
- Customers pre-pay or pay on the spot
- Confirmation text message includes unique code
- Vehicles enforced as an extension of your existing process
- Quick and easy set up

Key features of the service

- 'Park & Ride' VAT receipts offered
- Real-time management information and reports
- Supports tariffs for different vehicle types
- Option to disable pre-payment if desired

Tell me more

RingGo Park & Ride is extremely quick and easy to set up. Signs in the car park provide instructions, together with the standard rate number to call. Existing RingGo users are fast tracked, quoting the RingGo Park & Ride location code and their payment card security code. Non-RingGo users can register on the spot. An automated text message is sent to confirm payment and, having viewed this, the bus driver allows access.

Where is it offered?

Portsmouth City has offered RingGo Park & Ride since April 2010. Hartlepool offered the service during the Tall Ships event in July 2010.
